

The Medical Training Suite University of Kent Chatham 4th August 2022

A small group visited the Training Suite on Thursday and had a guided tour of the training facilities for medical staff at the University. The suite was fantastically equipped with simulations and is a great tool for nurses, paramedics etc. to practise before being allowed onto humans!

We were also given a tour of the longest library in the country which is the old drill hall for HMS Pembroke. The trip finished with a welcome coffee in the on-site cafe and a great morning was enjoyed by all.
